**CATE:**

**A frame-fixed  
carrier system**

for vehicles with or  
without trailer hitch

## GENERAL INFORMATION:

- Frame-fixed carrier system for a payload up to 300 kg (depending on vehicle).
- Suitable for vans, motorhomes and some off-road vehicles.
- Possible for vehicles with and without trailer hitch.
- Consisting of the vehicle-specific adapter + base frame + equipment to transport the motorcycle.
- A technical report is available for a variety of adapters. For some models an individual acceptance is required.
- Equipment for various transport purposes available.
- Raisable for parking situations.
- Assembly and individual acceptance (if necessary) are possible in our workshop.

## REQUIREMENTS:

- Motorhome or vehicles with an own construction must have a stable frame.
- The frame must have a sufficient material thickness (at least 3.5 mm) and extend to the rear apron.

## VEHICLE LOAD CAPACITY:

- We recommend to check the vehicle load capacity and additional burden of the rear axle. For this you need to weigh and measure your vehicle. We are happy to help you with the calculation or feel free to use the online tool on our website.
